leave meta, how & why ?

Down below is a reference to an article that will become your best companion when it comes to the still painful separation from Meta, because yes we are talking about a generation, the end of something, not to say an era. Which also means the beginning of something new, and we hope the joyfull resurgence of blogs, zines, and other neighborhood gazettes! :))

move your ass, not only on the dancefloor

A few protests safety tips

- Dress anonymously to blend in with the crowd.
- If you choose to remain visible, it is always best to protect your face and tattoos to prevent the cops from collecting collective data.
- It is always better not to bring your phone, but if you cannot get away from it, turn it off during a protest.
- In case of tear gas, a little mixture of maalo and water spray to avoid crying will already do the trick.
- The number of a legal team is always useful.
- And always, determination and mutual aid are necessary.

Stay tuned! <3 Klik Klaak
